

Dear parents,

Two important items:

1. Our after-school robotics class begins today starting at 2:45-3:45. Students that have signed up will just stay after school for the class. Parents can pick up their child (or they can walk home if you want) at 3:45. This will run every Wednesday for the next several weeks. It should be fun for the kids.
2. For the past couple of years, as part of our healthy lifestyle education, we have had the students run the equivalent of a marathon (a small portion each week) between the months of January and May with the culminating activity being the Provo Marathon and Kids run for the remaining 1.2 miles to complete their 26.2 miles.

We are continuing with the tradition this year and will have the kick-off assembly tomorrow (Thursday) and would like all of the students that have participated either of the past two years to wear their race running shirt they received at one of the events to help create excitement for this year.

Thanks so much. Please let us know if you have any questions on either of these items.

--Mr. Pitcher
